Education

Ph.D. in Physics — *Georgia Institute of Technology* — Atlanta, GA, USA — *Aug. 2012 – May. 2017*
- adviser: Prof. Predrag Cvitanović
- Research area : nonlinear dynamics, cycle expansion theory, complex Ginzburg-Landau equation

M.S. in Computer Science & Engineering — *Georgia Institute of Technology* — Atlanta, GA, USA — *Jan. 2016 – Jun. 2016*
- GPA: 3.86/4.0

B.S. in Physics — *Wuhan University* — Wuhan, China — *Sep. 2008 - Jun. 2012*

Skills

Programming : **Proficient :** C/C++, Java, Matlab; **Familiar :** Ruby, Python
Tools : Bash, Perl, vim, Latex, Emacs
Web : Django with Python, CSS, HTML

Industry Experience

Software Engineer @ Airbnb — *San Francisco CA*

Home Infra team — *2017/5/22 – now*
- Build and maintain Ebert (the review service) for *airbnb.com*

Research Experience

Center for Nonlinear Science, Georgia Institute of Technology — *Atlanta, GA, USA*

Role : Research Assistant Adviser : Prof. Predrag Cvitanović

Research topic : *Computation of Floquet vectors in Kuramoto-Sivashinsky system* — *2013 – 2014*
- **Main result:** The Floquet multipliers of Periodic orbits in high dimensional system usually spans a large orders of magnitudes. The periodic eigendecomposition is the right tool to obtain Floquet spectrum and vectors to high accuracy. See paper[2] for more detail.

Research topic : *Investigation of the local dimension of inertial manifolds in chaotic systems* — *2014 – 2015*
- **Main result:** By studying the shadowing cases of periodic orbits in Kuramoto-Sivashinsky system, we show strong evidence that the inertial manifold has dimension 8. see paper [1] for more details.

Research topic : *Symbolic dynamics in symmetry reduced 1-d Kuramoto-Sivashinsky system* — *2015 – Present*
- In the symmetry reduced state space, the attractor of 1-d Kuramoto-Sivashinsky system is low dimensional. By constructing appropriate Poincaré section, we propose to obtain the symbolic dynamics.

School of Mathematics, Georgia Tech — *Atlanta, GA, USA*

Role : Cooperation with Prof. Sung Ha Kang from Math department

Research topic : *Integration of soliton explosion with local error control in cubic quintic Ginzburg-Landau system* — *Sprint 2016*
- **Main result:** Study the performance of exponential integrator in Ginzburg-Landau system, and add time step control into a few popular exponential integrators. See paper [3].

Conferences & Talks

SIAM Conference on Application of Dynamical Systems — *Snowbird, Utah, USA*

Talk : Periodic Eigendecomposition and Its Application in Nonlinear Dynamics — *May 2015*
- Coauthor: Prof. P. Cvitanović

Dynamics Days US — *Atlanta, GA, USA*

Poster : Lyapunov exponents, Floquet exponents and covariant vectors in Kuramoto-Sivashinsky equation — *Jan. 2014*
- Coauthor: Prof. P. Cvitanović
