□ (+1) 678-882-9228 | Markeding and incom/in/xiong | Markedin.com/in/xiong | Skills **Programming:** C++, Python, Java

Skills: Numerical PDE, Matrix analysis, MS SQL server, ElasticSearch, Kafka, Spark, Airflow

## **Industry Experience**

#### Citadel LLC Software Engineer

Chicago, IL, USA

09/03/2019 - Present

### Reconciliations and Control infra team \_

- Build rec&control system v3:
  - Help design the new reconciliation system from scratch. Share my knowledge about the old system to all new members in the team.
  - Build infra components of the new system such as Kafka C++ client, datadog C++ client, logging module and so on.
  - Help build the core matching C++ service using Apache Arrow. Optimize the matching process, especially the hot path to reduce run time as much as possible.
- Disaster Recovery:

  Main contributor for disaster recovery (DR) planning and execution.
- Write the scripts that submit CName change requests, change load balance configuration, sync files between different data centers, and etc.
- Successfully switch R&C data centers multiple times with no user impact.
- Other responsibilities:
  - Maintain v2 system and add business features on a regular basis. Maintain a good relationship with business side and act as POC for production
- Help automate Futures/Options, FTR (Financial Transmission Right), and a few other OTC products reconciliation process.
- Used framework & tools: C++ Boost, Apache.Arrow, Spring Boot, multithreading, MS SQL server, Kafka, Datadog

#### Airbnb Software Engineer

San Francisco, CA, USA

05/22/2017 - 08/27/2019

03/01/2019 - 08/27/2019

- Search ranking team \_ • Main contribution:
  - migrate the heaviest job from RDD to Dataset, whose runtime was redcued from 3h to 30m.
  - Use a new way to attribute user searches to their final bookings, which doubled the size of training data.
  - Used framework & tools: Spark, Hive, Airflow, Scala

Home infra team. Main contributions: 05/22/2017 - 2/28/2019

- Build the next generation of review service for Airbnb. This is a review platform that supports different business verticals' reviews. We had
  - successfully migrated 340+M reviews and 1B+ review categories to new review schema without downtime. Collaborate with storage team to setup the derived data store to provide real-time review aggregated data, i.e., review counts, review rating histogram and so on, which improved the tail latency by half.
  - Migrate AWS EC2 review Elasticsearch cluster to AWS managed ES cluster. Also upgrade ES version from 1.4.5 to 6.2.1
- Used framework & tools: Dropwizard, Chef, Airflow, Elasticsearch, Mcrouter Cache, Powergrid (multithreading)

## Education

Ph.D. in Physics		Georgia Institute of Technology	Atlanta, GA, USA	08/15/2012 - 05/05/2017
M.S. in Computer Science & Engineering	GPA: 3.86/4.0	Georgia Institute of Technology	Atlanta, GA, USA	01/01/2016 - 06/01/2016
B.S. in Physics	GPA: 3.75/4.0	Wuhan University	Wuhan, China	09/01/2008 - 06/05/2012

## Research Experience

### Center for Nonlinear Science, School of Physics, Georgia Institute of Technology

Atlanta, GA, USA 06/01/2013 - 05/05/2017

- **Research topic:** Computation of Floquet vectors in Kuramoto-Sivashinsky system
- main Result: Find the smallest eigenvalue of Floquet matrix to be order of  $10^{-3000}$  with relative accuracy  $10^{-14}$ .
- Research topic: Investigation of the local dimension of inertial manifolds in chaotic systems
  - main Result: We show strong evidence that the inertial manifold of 1-d Kuramotó-Sivashinsky system has dimension 8.
- Research topic: Symbolic dynamics in symmetry reduced 1-d Kuramoto-Sivashinsky system
  - main Result: In the symmetry reduced state space, we propose to obtain the symbolic dynamics of 1-d KS equation by constructing appropriate Poincaré sections

### School of Mathematics, Georgia Institute of Technology

Atlanta, GA, USA 01/01/2016 - 06/01/2016

Research topic: Time-step adaptive exponential integrator for soliton explosions in 1d and 2d cubic quintic Ginzburg-Landau systems main Result: Formulize a new time-step adaptive exponential integrator for complex GL equation.
